The International Encyclopedia of Primatology represents the first comprehensive encyclopedic reference focusing on the behaviour, biology, ecology, evolution, genetics, and taxonomy of human and non-human primates.

- * Represents the first comprehensive encyclopedic reference relating to primatology
- * Features more than 450 entries covering topics ranging from the taxonomy, history, behaviour, ecology, captive management and diseases of primates to their use in research, cognition, conservation, and representations in literature
- * Includes coverage of the basic scientific concepts that underlie each topic, along with the latest advances in the field
- * Highly accessible to undergraduate and graduate students in primatology, anthropology, and the medical, biological and zoological sciences
- * Essential reference for academics, researchers and commercial and conservation organizations
