## Paradigm Shift in International Economic Law Rule-Making

### TPP as a New Model for Trade Agreements?

The TPP was negotiated among 12 economically diverse countries, including some most highly developed and rich countries (i.e., the United States, Japan, Australia, Canada, New Zealand, and Singapore), some newly industrialized countries (i.e., Mexico and Malaysia), and some less-developed countries (i.e., Peru, Chile, and Vietnam). A new paradigm created in this context is that countries with vastly different economic developments can actually agree on a set of very high standards to regulate their economic activities, to liberalize their trade, and to protect intellectual property and foreign investment. The contents of the TPP also reflect its status of being a “new paradigm” as[...]

## Shifting Perspectives on the European Public Prosecutor's Office

This book provides answers to the following questions. Is there a bright future ahead for a European Public Prosecutor's Office? If so, is the regulation establishing the office sufficiently clear and balanced to attain that goal? Moreover, will the office be able to effectively fight fraud now damaging the EU's bud-

get and will it respect the fundamental rights of the parties involved? Included are issues ranging from EU substantive and procedural criminal law, combatting EU fraud, the distribution of competences in European law enforcement, EU fundamental rights, to forum choice. The book's aim is to inform academics, policy-makers and criminal law practitioners about key issues[...]

## Yearbook of International Humanitarian Law Volume 19, 2016

The general theme of this volume of the Yearbook of International Humanitarian Law is armed groups and the challenges arising from the participation of such groups in contemporary armed conflicts. It is elaborated upon in several chapters, addressing the organisation criterion, respect for and compliance with international humanitarian law and international human rights law, targeted sanctions and accountability issues, among other things. Besides these chapters that can be connected to the general theme, the book also contains a chapter dedicated to the ‘knock on the roof’ practice, a Year in Review, describing the most important events and legal developments that took place in 2016,[...]

## Democracy and Financial Order: Legal Perspectives

This book discusses the relationship between democracy and the financial order from various legal perspectives. Each of the nine contributions adopts a unique perspective on the legal and political challenges brought to the fore by the Global Financial Crisis. This crisis and the ensuing sovereign debt crisis in Europe are only the latest in a long series of financial crises around the globe in recent decades. By their very existence, but also as a result of the political turmoil they have created, these financial crises testify to the well-known tensions between democracy and a market-based economic and financial order. However, what is missing in this debate is an analysis of the[...]

## Copyright and Fan Productivity in China

### A Cross-jurisdictional Perspective

This book takes a unique approach to mitigate the problem of massive online copyright infringement and justify fan activities. It argues for a cooperative approach that encourages copyright owners to exert a degree of control over their fan creators. In contrast to the current approach, which treats fan utilizations as theft, this book suggests that the copyright owners and the lawmakers should instead distinguish between fan creators and commercial pirates, allowing them to unleash their potential. This book offers a clear and comprehensive account of the fascinating aspects

of legal problems created by fan activities in China, Japan and the United States, offering a valuable guide for[...]

## Dehumanization of Warfare

### Legal Implications of New Weapon Technologies

This book addresses the technological evolution of modern warfare due to unmanned systems and the growing capacity for cyberwarfare. The increasing involvement of unmanned means and methods of warfare can lead to a total removal of humans from the navigation, command and decision-making processes in the control of unmanned systems, and as such away from participation in hostilities – the “dehumanization of warfare.” This raises the question of whether and how today’s law is suitable for governing the dehumanization of warfare effectively. Which rules are relevant? Do interpretations of relevant rules need to be reviewed or is further and adapted regulation necessary? Moreover, ethical[...]

## Handbook of Agri-Food Law in China, Germany, European Union

### Food Security, Food Safety, Sustainable Use of Resources in Agriculture

This book offers a new and differentiated overview of Agri-Food Law against the background of national and global integration of markets, and compares for the first time important aspects of the agricultural, environmental and food law of China and Germany / the European Union. In addition to the basics, it discusses a wide range of issues, such as the respective legal regulatory structures for food security, food safety, geographical indications of origin, climate protection, fertilizers, plant protection products, genetic engineering, water protection, soil protection, land resources and organic farming. In addition, it addresses key environmental impacts and developments in order[...]
