### 本書の内容

Development of Thinking in Adulthood is a timely synthesis and evaluation of the current knowledge and emerging issues relating to adult cognitive development and learning. Focusing on psychological and educational cutting-edge research as well as giving an overview of the key theorists such as Piaget and Kohlberg, the authors offer a holistic view on the development of adult thinking, representing perspectives from developmental, personality and social psychology, as well as education, comparative religion, and philosophy. It will suit students and researchers in developmental psychology and related courses as well as adult educators and teachers working in adult education.
