1. Banyard, P. et al. (eds)

Essential Psychology, 3rd Edition. July 2019, 840pp., Hardcover (SAGE) ISBN 9781526456847 ¥28,300

The third edition of Essential Psychology provides a thorough introduction for students and anyone who wishes to gain a strong overview of the field. This team of authors provide a student-friendly guide to Psychology, with a vivid narrative writing style, features designed to stimulate critical thinking and inspire students to learn independently, and online resources for lecturers and students. This comprehensive introductory text is relevant for both the specialist and non-specialist psychology student, challenging those who studied psychology before university while remaining accessible to those who did not.

2. Denzin, N.K. & M.D. Giardina (eds)

Qualitative Inquiry at a Crossroads: Political, Performative, and Methodological Reflections.

(International Congress of Qualitative Inquiry Series) March 2019, 200pp., Hardback (Routledge) ISBN 9780367174385 ¥36,610

(Paperback ISBN 9780367174392 ¥8,780)

3. Fincher, S.A. & A.V. Robins (eds)

6. Leavy, P. (ed)

The Oxford Handbook of Methods for Public Scholarship. July 2019, 744pp., Hardcover (Oxford U.P.) ISBN: 9780190274481 ¥35,380

One-of-a-kind text for researchers/students looking to design research projects that contribute to public knowledge on their topic. Features original material by well-respected

scholars and practitioners across a range of fields. Includes practical instruction on writing up research, distributing research, and seeking grants.

【欠損データの統計解析・第3版】

7. Little, R.J.A. & D.B. Rubin

Statistical Analysis with Missing Data, 3rd Edition. (Wiley Series in Probability and Statistics) July 2019, 448pp., Hardcover (Wiley) ISBN 9780470526798 ¥17,960

Statistical Analysis with Missing Data, Third Edition starts by introducing readers to the subject and approaches toward solving it. It looks at the patterns and mechanisms that create the missing data, as well as a taxonomy of missing data. It then goes on to examine missing data in experiments, before discussing complete-case and available-case analysis, including weighting methods. The new edition expands its coverage to include recent work on topics such as nonresponse in sample surveys, causal inference, diagnostic methods, and sensitivity analysis, among a host of other topics.

【心の生理学および病理学 - 医学の歴史】

8. Maudsley, H.

The Physiology and Pathology of the Mind. (Series: Cambridge Library Collection - History of Medicine) April 2019, Paperback (Cambridge U.P.) ISBN 9781108080460 ¥7,800

In Maudsley's many publications, he developed ideas of heredity derived from Darwin and argued strongly for the physical basis of mental illness. This ambitious 1867 book was very well received; by 1883 two further expanded English editions had appeared, as well as German and French translations. In his preface, Maudsley emphasises the importance of considering 'the phenomena of the sound and unsound mind' in a single scientific discipline rather than studying them from only one of the perspectives of metaphysics, physiology or pathology.

9. McDowall, D. et al.

Interrupted Time Series Analysis. Sept 2019, 208pp., Hardcover (Oxford U.P.) ISBN 9780190943943 ¥17,960

(Paperback ISBN 9780190943950 ¥4,520)

Provides tools for researchers whose data consist of a long sequence of observations measured before and after a treatment, intervention, or other significant change. Integrates the statistical issues of design, estimation and interpretation with foundational validity issues. Provides a unique focus on time series experiments. Emphasizes graphical aspects of time series analysis, including more than 130 figures and an equal number of tables. Includes over forty example analyses that instructors could assign as problems to students.

12. Sternberg, R.J. et al. (eds)
**The Cambridge Handbook of the Intellectual
 History of Psychology.** (Series: Cambridge Hand-
 books in Psychology) Aug 2019, Hardcover (Cam-
 bridge U.P.) ISBN 9781108418690 ¥33,560
 (Paperback ISBN 9781108406345 ¥10,340)

We cannot understand contemporary psychology without first researching its history. Unlike other books on the history of psychology, which are chronologically ordered, this Handbook is organized topically. It covers the history of ideas in multiple areas of the field and reviews the intellectual history behind the major topics of investigation. The evolution of psychological ideas is described alongside an analysis of their surrounding context. Readers learn how eminent psychologists draw on the context of their time and place for ideas and practices, and also how innovation in psychology is an ongoing dialogue between past, present, and anticipated future.

13. Valls, J.L.
**Dictionary of Freud: A Comprehensive
 Guide to Freudian Concepts.** April 2019,
 400pp., Hardcover (Routledge) ISBN
 9780367151003 ¥36,610
 (Paperback ISBN 9780367151034 ¥9,760)

The Dictionary of Freud provides a comprehensive and accessible guide to essential Freudian terms and concepts. Organized conceptually, the book is grounded in detailed and meticulous readings, and covers the full range of Freud's writings and subjects. It also provides an overview of the development, vicissitudes, and syntheses of Freud's unique lines of thought. Contemporary developments in psychoanalytic thought have aspired to surpass their Freudian origins. But this comprehensive guide to Freud's work provides a touchstone for those wishing to clarify these roots, and the foundations of the discipline itself. It will be a valuable companion to psychoanalysts in practice and training across a range of schools, as well as a reference work for sociologists, artists, philosophers, historians and other scholars.

Sleep-Wake Neurobiology and Pharmacology.
 (Series: Handbook of Experimental Pharmacology, Vol
 253) Nov 2019, Hardcover (Springer) ISBN
 9783030112707 ca. ¥30,030

This volume connects current ideas and concepts about sleep functions and circadian rhythms with the search for novel target-selective sleep-wake therapeutics. To do so, it provides a timely, state-of-the-art overview of sleep-wake mechanisms in health and disease, ongoing developments

in drug discovery, and their prospects for the clinical treatment of sleep-disordered patients. It particularly focuses on the concept that sleep and wakefulness mutually affect each other, and the future therapeutic interventions with either sleep- or wake-promoting agents that are expected to not only improve the quality of sleep but also the waking behavior, cognition, mood and other sleep-associated physiological functions.

26. Winn, P. & M. Grealy (eds)

Biological Psychology. (Series: Critical Concepts in Psychology) Aug 2019, 1329pp., Hardcover (Routledge) ISBN 9780415686969 ¥218,450

The fascinating and rapidly growing field of biological psychology—also widely known as biopsychology, behavioural neuroscience, or psychobiology—is concerned with the relationship between brain and behaviour. Broadly speaking, biological psychologists seek to understand dizzyingly difficult questions about how biological processes underlie normal (and abnormal) behaviour and other psychological states and processes. As research in and around biological psychology burgeons as never before, this new four-volume collection from Routledge's acclaimed Critical Concepts in Psychology series meets the need for an authoritative reference work to make sense of a rapidly growing and ever more complex corpus of literature. Edited by two leading scholars, the collection gathers foundational and canonical work, together with innovative and cutting-edge applications and interventions. With a full index, together with a comprehensive introduction, newly written by the editors, which places the collected material in its historical and intellectual context, Biological Psychology is an essential work of reference. The collection will be particularly useful as an essential database allowing scattered and often fugitive material to be easily located. It will also be welcomed as a crucial tool permitting rapid access to less familiar—and sometimes overlooked—texts. For researchers and advanced students, it is a vital one-stop research and pedagogic resource.

Introduction to Addiction, Volume 1: Addiction, Animal Models, and Theories. (Neurobiology of Addiction Series) June 2019, 400pp., Paperback (Academic Pr.) ISBN 9780128168639 ¥22,680

Introduction to Addiction, Volume One in the series, introduces the reader to the study of neurobiology of addiction by clearly defining addiction and its neuroadaptational views. This volume includes thorough descriptions of the various animal models applicable to the study of addiction, including Animal Models of the Binge-Intoxication Stage of the Addiction Cycle and Animal Models of Vulnerability to Addiction. The book's authors also include a section on numerous neurobiological theories that aid in the understanding of addiction, including dopamine, prefrontal cortex and relapse.

発達・教育心理学

31. Acevedo, E.O.

The Oxford Encyclopedia of Sport, Exercise, and Performance Psychology. April 2019, 1384pp., Hardcover (Oxford U.P.) ISBN 9780190634575 ¥71,660

The Oxford Encyclopedia of Sport, Exercise, and Performance Psychology is a double volume, in-depth, up-to-date scholarly reference work written by leading scholars from across the globe. The study of human psychomotor performance spans numerous activities including sport, performing arts, surgery, firefighting, law enforcement, military operations, and physical activity participation. In addition, research questions address factors that influence optimal performance as well as the adoption and maintenance of physical activity for mental and physical health. The breadth of focused scientific peer-reviewed articles provides a reliable source of specialized information to academicians, practitioners, advanced undergraduates and graduate students, and researchers in related fields. Each expert author was individually commissioned and articles were reviewed by recognized authorities. Finally, the accompanying digital platform facilitates regular updates and allows cross-linking between articles.

【幼児における知能の構築】

32. Bornstein, M.H. & D.L. Putnick

The Architecture of the Child Mind: g, Fs, and the Hierarchical Model of Intelligence.

March 2019, 232pp., Hardcover (Routledge) ISBN 9780367135843 ¥28,060

What exactly does it mean to be intelligent? Does intelligence manifest itself in one way or in different ways in children? How do children fit any preconceived notions of intelligence? Some theories assert a general (g) factor for intelligence that is universal and enters all mental abilities; other theories that there are many separate domains or faculties (Fs) of intelligence; and still others that the g and Fs of intelligence coexist in a hierarchical relation. The Architecture of the Child Mind: g, Fs, and the Hierarchical Model of Intelligence argues for the third option in young children. Through state-of-the-art methodologies in an intensive research program conducted with 4-year-old children, Bornstein and Putnick show that the structure of intelligence in the preschool child is best construed as a hierarchically organized combination of a general intelligence factor (g) and multiple domain-specific faculties (Fs).

46. Renninger, K.A. & S.E. Hidi

The Cambridge Handbook of Motivation and Learning. (Cambridge Handbooks in Psychology) April 2019, 822pp., Hardcover (Cambridge U.P.) ISBN 9781107177932 ¥33,560

Written by leading researchers in educational and social psychology, learning science, and neuroscience, this edited volume is suitable for a wide-academic readership. It gives definitions of key terms related to motivation and learning alongside developed explanations of significant findings in the field. It also presents cohesive descriptions concerning how motivation relates to learning, and produces a novel and insightful combination of issues and findings from studies of motivation and/or learning across the authors' collective range of scientific fields. The authors provide a variety of perspectives on motivational constructs and their measurement, which can be used by multiple and distinct scientific communities, both basic and applied.

48. Smith, J. & M. Durham

Sociolinguistic Variation in Children's Language: Acquiring Community Norms. (Series: Studies in Language Variation and Change) June 2019, Hardcover (Cambridge U.P.) ISBN 9781107172616 ¥19,950

How we vary our speech is fundamental in signalling who we are, where we're from and where we're going. How and when does such variation arise? Here, leading experts Jennifer Smith and Mercedes Durham address this question through a sociolinguistic analysis of the speech of preschool children in interaction with their primary caregivers. Bringing together two fields of linguistic research - variationist sociolinguistics and first language acquisition - the study focusses both qualitative and quantitative analysis of a range of variables to show when and how variation is acquired by young children, and the effect the caregiver's interaction has on this process. In doing so, they tackle a fundamental question in language research: when and how do children acquire the highly complex patterns of variation widely attested in adult speech?

49. Stetsenko, A.

Cognitive Evolution. May 2019, 392pp., Hardcover (Routledge) ISBN 9780367028541 ¥36,610 (ISBN 9780367028558 ¥10,000)

Cognitive Evolution provides an in-depth exploration of the history and development of cognition, from the beginning of life on Earth to present-day humans. Drawing together evolutionary and comparative research, this book presents a unique perspective on the evolution of human cognition. Adopting an information processing perspective – that is, from inputs to outputs, with all the mental processes in between, Boles provides a systematic overview of the evolutionary development of cognition and of its sensation, movement, and perception components.

Implicit Learning: 50 Years On. April 2019, 262pp., Hardcover (Routledge) ISBN 9781138644298 ¥23,180

(Paperback ISBN 9781138644304 ¥7,800)

Can we learn without knowing we are learning? To what extent is our behavior influenced by things we fail to perceive? What is the relationship between conscious and unconscious cognition? *Implicit Learning: 50 Years On* tackles these key questions, fifty years after the publication of Arthur Reber's seminal text. Providing an overview of recent developments in the field, the volume considers questions about the computational foundations of learning, alongside phenomena including conditioning, memory formation and consolidation, associative learning, cognitive development, and language learning.

58. Dunlosky, J. & K.A. Rawson (eds)

The Cambridge Handbook of Cognition and Education. (Cambridge Handbooks in Psychology) April 2019, 748pp., Hardcover (Cambridge U.P.) ISBN 9781108416016 ¥33,560

This Handbook reviews a wealth of research in cognitive and educational psychology that investigates how to enhance learning and instruction to aid students struggling to learn and to advise teachers on how best to support student learning. The Handbook includes features that inform readers about how to improve instruction and student achievement based on scientific evidence across different domains, including science, mathematics, reading and writing. Each chapter supplies a description of the learning goal, a balanced presentation of the current evidence about the efficacy of various approaches to obtaining that learning goal, and a discussion of important future directions for research in this area. It is the ideal resource for researchers continuing their study of this field or for those only now beginning to explore how to improve student achievement.

The Neuroethics of Memory: From Total Recall to Oblivion. Oct 2019, Hardcover (Cambridge U.P.) ISBN 9781107131972 ¥19,050

(Paperback ISBN 9781107583412 ¥6,340)

The Neuroethics of Memory is a thematically integrated analysis and discussion of neuroethical questions about memory capacity and content, as well as interventions to alter it. These include: how does memory function enable agency, and how does memory dysfunction disable it? To what extent is identity based on our capacity to accurately recall the past? Could a person who becomes aware during surgery be harmed if they have no memory of the experience? How do we weigh the benefits and risks of brain implants designed to enhance, weaken or erase memory? Can a person be responsible for an action if they do not recall it? Would a victim of an assault have an obligation to retain a memory of this act, or the right to erase it? This book uses a framework informed by neuroscience, psychology, and philosophy combined with actual and hypothetical cases to examine these and related questions.

The Cambridge Handbook of Creativity, 2nd Edition. (Series: Cambridge Handbooks in Psychology) June 2019, Hardcover (Cambridge U.P.) ISBN 9781107188488 ¥33,560

(Paperback ISBN 9781316638545 ¥11,790)

This second edition of the renowned Cambridge Handbook of Creativity expands on the first edition with over two thirds new material reaching across psychology, business, entrepreneurship, education, and neuroscience. It introduces creativity scholarship by summarising its history, major theories and assessments, how creativity develops across the lifespan, and suggestions for improving creativity. It also illustrates cutting-edge work on genetics and the neuroscience of creativity, alongside creativity's potential for both benevolence and malevolence. The chapters cover the related areas of imagination, genius, play, and aesthetics and tackle questions about how cultural differences, one's physical environment, mood, and self-belief can impact cre-

ativity. The book then examines the impacts on creativity of behaviour by teachers, managers, and leaders in particular.

68. Kornblith, H.

Second Thoughts and the Epistemological Enterprise. Sept 2019, Hardcover (Cambridge U.P.) ISBN 9781108498517 ¥18,140

What happens when we have second thoughts about the epistemic standing of our beliefs, when we stop to check on beliefs which we have already formed or hypotheses which we have under consideration? In the essays collected in this volume, Hilary Kornblith considers this and other questions about self-knowledge and the nature of human reason. The essays draw extensively on work in social psychology to illuminate traditional epistemological issues: in contrast with traditional Cartesian approaches to these issues, Kornblith engages with empirically motivated skeptical problems, and shows how they may be constructively addressed in practical and theoretical terms. As well as bringing together ten previously published essays, the volume contains two entirely new pieces that engage with ideas of self and rational nature. Kornblith's approach lays the foundations for further development in epistemology that will benefit from advances in our understanding of human psychology.

Perception as Information Detection: Reflections on Gibson's Ecological Approach to Visual Perception. Aug 2019, 376pp., Hardcover (Routledge) ISBN 9780367312954 ¥36,610

(Paperback ISBN 9780367312961 ¥10,000)

This book provides a chapter-by-chapter update to and reflection on of the landmark volume by J.J. Gibson on the Ecological Approach to Visual Perception (1979). Gibson's book was presented a pioneering approach in experimental psychology; it was his most complete and mature description of the ecological approach to visual perception. Perception as Information Detection commemorates, develops, and updates each of the sixteen chapters from Gibson's volume. The book brings together some of the foremost perceptual scientists in the field, from the United States, Europe, and Asia, to reflect on Gibson's original chapters, expand on the key concepts discussed and relate this to their own cutting-edge research. This connects Gibson's classic with the current state of the field, as well as providing a new generation of students with a contemporary overview of the ecological approach to visual perception. Perception as Information Detection is an important resource for perceptual scientists as well as both undergraduates and graduates studying sensation and perception, vision, cognitive science, ecological psychology, and philosophy of mind.

【認知 - 考える動物・第4版】

75. Willingham, D.T. & C. Riener

Cognition: The Thinking Animal, 4th Edition.

Oct 2019, 448pp., Paperback (Cambridge U.P.) ISBN 9781107525122 ¥18,140

By describing experiments that control, manipulate and measure mental processes, this book shows how we can discover the answers to key questions about the mind, such as: 'Can we focus attention on more than one thing?' and 'Is language unique to humans?' Written in a down-to-earth narrative prose that avoids jargon, addresses the reader di-

rectly and draws on the authors' unique style ('suppose Willingham split his pants at a junior high dance ...'), this text takes complex experiments in cognitive psychology and describes them for undergraduate students. Willingham has a record of excellence in translating cognitive psychology research for K-12 teachers with his bestselling Why Don't Students Like School? and other popular books. This book applies the clear and approachable prose style towards building foundational knowledge in cognitive psychology for undergraduates.

How can we explain the rise of populism in politics? What makes some people successful political leaders? What motivates us to vote the way we do? The Psychology of Politics explores how the emotions which underpin everyday life are also vital in what happens on the political stage. It draws on psychoanalytic ideas to show how fear and passion shape the political sphere in our changing societies and cultures, and examines topical social issues and events including Brexit, the changing nature of democracy, activism, and Trump in America. In a changing global political climate, The Psychology of Politics shows us how we can make sense of what drives human conduct in relation to political ideas and action.

Integrated Care for the Traumatized: A Whole-Person Approach. July 2019, 240pp., Hardcover (Rowman & Littlefield) ISBN 9781538121375 ¥16,320

Integrated Care for the Traumatized puts forth a model for the future of behavioral health focused on health care integration and the importance of the Whole Person Approach (WPA) in guiding the integration. This book fills a void applying the WPA integration to the traumatized that enables the reader to learn from experienced trauma practitioners on how to assess and treat trauma as humanely and compassionately as possible. This approach of expanding the possibilities of behavioral health by centering upon the whole person is an old idea that is emerging as a modern solution to over specialized practices. Among other things this WPA approach, completed with spirituality, psychology, medicine, social work, and psychiatry, helps traumatized and their families function in the social environment.

Managing Employee Well-being and Resilience for Innovation: Evidence from Knowledge-intensive Service Industries. Mar 2019, 198pp., Hardcover (Springer) ISBN 9783030061876 ¥17,320

This book employs a multidisciplinary and multi-level perspective to understand how well-being and resilience can influence innovation in knowledge-intensive contexts. Building on the authors' work in the areas of innovation management, human resource management and the psychological aspects of employee well-being, rich empirical data is presented and analysed in order to develop a conceptual framework. An interdisciplinary and insightful read for those studying HRM, innovation and psychology, this book is aimed at scholars who are interested in examining the relationships between micro- (individual) and meso-level (organisational and managerial practices) influences on innovation outcomes.

125. D'Cruz, P. et al. (eds)
Concepts, Approaches and Methods. (Handbooks of Workplace Bullying, Emotional Abuse and Harassment, Vol 1) Oct 2019, 550pp., Hardcover (Springer) ISBN 9789811301339 ¥64,350

This volume captures themes and debates around elucidating and studying workplace bullying, emotional abuse and harassment. The chapters presented here underscore the complexities and nuances of the phenomenon and showcase the various techniques relevant to and concerns associated with researching it. Debates abound as to what workplace bullying, emotional abuse and harassment is and what it is not, leading to a construct bind. Viewpoints are exchanged over how best to uncover the topic so as to ensure that recommendations for action are anchored in rigour. Section 1 portrays the gamut of variants that constitute workplace bullying, emotional abuse and harassment, such as interpersonal bullying, depersonalized bullying and cyberbullying, alongside theoretical underpinnings, contentious stances and contemporary contextual influences. Section 2 speaks to the challenges of studying a sensitive, multi-person, multi-level problematic, highlighting the possibilities offered by quantitative, qualitative and mixed paradigms. Advanced designs and innovative strategies that facilitate explanatory power, reliability and validity are put forward.

Pathways of Job-related Negative Behaviour. (Handbooks of Workplace Bullying, Emotional Abuse and Harassment, Vol 2) Oct 2019, 400pp., Hardcover (Springer) ISBN 9789811309342 ¥60,060

Workplace bullying, emotional abuse and harassment unfolds as a process, usually recursive and escalating, that involves multiple actors and stakeholders. Through Section 1 of this volume, the antecedents and effects of workplace bullying, emotional abuse and harassment are detailed. Apart from discussing individual and organizational causative factors and adverse outcomes for targets and organizations, this section presents issues pertaining to target coping and survival and power versus powerlessness as dialectic rather than sovereign. Emergent research examining the physiological impact on targets, the controversial interplay of personality and the striving towards well-being is showcased. Section 2 brings together chapters on the various key players in the workplace bullying, emotional abuse and harassment scenario. The focus here is on targets, bullies, bystanders, leaders and significant others as well as the range of interventionists (such as HR managers, therapists, organizational practitioners, unionists and so on) who address situations of misbehaviour. The motives, experiences and outcomes of the former group and the roles, dilemmas and challenges of the latter group are elaborated.

Dignity and Inclusion at Work. (Handbooks of Workplace Bullying, Emotional Abuse and Harassment, Vol 3) Oct 2019, 550pp., Hardcover (Springer) ISBN 9789811302176 ¥60,060

The agenda of respectful workplaces is no more urgent than in the context of workplace bullying, emotional abuse and harassment. This becomes even more significant in the face of mistreatment linked to social identity and national culture. The chapters constituting Section 1 speak to the spectrum of primary, secondary and tertiary prevention undertaken within and beyond workplaces to tackle workplace bullying, emotional abuse and harassment. As well as organizational-related

Special Topics and Particular Occupations, Professions and Sectors. (Handbooks of Workplace Bullying, Emotional Abuse and Harassment, Vol 4) Oct 2019, 550pp., Hardcover (Springer) ISBN 9789811053078 ¥64,350

Section 1, which comprises special topics, depicts the intersection between workplace bullying, emotional abuse and harassment and specific circumstances such as whistleblowing and customer abuse or particular attributes such as violence and ostracism. In so doing, it extends the boundaries of the substantive area, stimulating new themes for further inquiry and indicating new areas for action. Section 2 draws attention to how misbehaviour inheres in particular kinds of tasks and livelihoods due to job design, work organization and other elements such as power, external environment, employment patterns and so on. An

array of occupations, professions and sectors such as academe, nursing, law, hospitality, precarious work and so on is covered, reflecting emergent developments in the labour market so as to include those with long-standing and considerable research findings and those where empirical inquiries are more recent.

Leadership and Diversity in Psychology: Moving Beyond the Limits. March 2019, 248pp., Hardback (Routledge) ISBN 9781138361638 ¥28,060

Leadership and Diversity in Psychology explores the topic of leadership and diversity from a range of different perspectives. The authors draw from professional experience and research to support their reflections on leadership with diverse populations, leadership in organizations and developing leadership style. Incorporating current theory and up to date research concerning current trends towards more relational and integrative work, the book emphasises practitioner's reflections of their own experience. It reflects the contemporary focus towards more pluralistic/integrative practice which has moved away from traditional orientations involving specific ways of working.

133. Ratner, C.
Neoliberal Psychology. (International and Cultural Psychology) Jan 2019, 209pp., Hardcover (Springer) ISBN 978-3030029814 ¥22,060

This provocative monograph defines the elusive concept of neoliberal psychology, focusing on its form, content, and cultural contexts and establishing it as a core feature of modern society. Its cross-cultural analysis examines the reality of neoliberal psychology in the globalized world, asserting that neoliberalism influences individuals' sense of self, identity, and—regardless of country of origin—concept of nationality. Macro cultural psychological theory opens out neoliberal psychology in its most visible aspects, such as work life, sexuality, consumer behavior, and the shared vision of the good life. At the same time, the author identifies profound social inequities and other negative aspects of neoliberal society and discusses how they may be corrected.

Improving Aviation Performance through Applying Engineering Psychology. (Advances in Aviation Psychology, Volume 3) March 2019, 288pp., Hardcover (CRC Pr.) ISBN 9781138588639 ¥28,060

Aviation is one of the most active and challenging domains for human factors and applied psychology. Since 1981 the biennial International Symposium on Aviation Psychology has convened to present the latest research on human performance problems within aviation systems, provide design solutions that best utilize human capabilities for safe and efficient systems, and bringing together scientists, researcher, and operators to bridge the gap between research and application. This new volume will include the best ideas from the 19th International Symposium held in Dayton, Ohio in 2017. It will also communicate concepts, methodologies, findings, and debates to the aviation community globally.

The Oxford Encyclopedia of Psychology and Aging

Edited by **Bob G. Knight, PhD**

2019年4月出版 1864ページ ¥99,960

Published by Oxford U.P. ISBN: 9780190681852

In The Oxford Encyclopedia of Psychology and Aging, Bob Knight and an editorial team comprised of Nicole Anderson, Shevaun Neupert, Nancy Pachana, and Hans Werner-Wahl, have created a comprehensive collection of peer-reviewed articles authored by the top researchers in the field. This work, which is available both in print and digitally, serves as a reference to provide a broad overview of the field of psychology and aging, and as a springboard for delving more deeply into specific topics. The first section covers theories and conceptual models that shape the field, including perspectives from neighboring disciplines like biology and sociology of aging. The second covers methodologies and analytic approaches to the study of aging. Section three explores the cognitive and affective neuroscience of aging. Section four covers a wide range of social and environmental influences on aging and on older adults. Section five covers clinical geropsychology, developmental psychopathology and the implications of aging, and finally the late life context for psychological assessment and therapy with older adults.

Table of Contents:

Theories and Conceptual Models in Psychology and Aging

Ever-Emerging Theories of Aging (W. Andrew Achenbaum). Integrated Theories of Biological Aging (Conscience P. Bwiza, Jyung Mean Son, and Changhan Lee). Cognitive Reserve in the Aging Brain (Michael J. Valenzuela). Stress and Coping Theory Across the Adult Lifespan (Agus Surachman and David M. Almeida). New Directions in Theories of Emotion and Aging (Joseph A. Mikels and Nathaniel A. Young). Dynamic Integration Theory (Manfred Diehl, Eden Griffin, and Allyson Brothers). Social Gerontology Theories: Past, Present, and Future (Jill Suito, Megan Gilligan, Marissa Rurka, Yifei Hou, and Gulcin Con). Family Systems Theory (Sara Honn Qualls and Lacey Edwards). A Sociocultural-Constructionist Epistemology for the Psychology of Aging (Roger L. Peterson and Katherine A. Lambos). Successful Aging: History and Prospects (John W. Rowe and Dawn C. Carr). Cultural Values and the Nature of Successful Aging (Sandra Torres)

Lifespan Developmental Methodology and Analyses

Statistics

Longitudinal, Cross-Sectional, and Sequential Designs in Lifespan Developmental Psychology (Susan Krauss Whitbourne). Statistical Mediation in Lifespan Developmental Analyses (Oscar Gonzalez and David P. MacKinnon). Intraindividual Variability in Lifespan Developmental Methodology (Eric S. Cerino and Karen Hooker). Longitudinal Structural Equation Modeling in Lifespan Developmental Analyses (Philip Parker and Robert Brockman). Methodology for Twin Studies of Aging (Michael J. Lyons, Chandra A. Reynolds, William S. Kremen, and Carol E. Franz). Moderation in Lifespan Developmental Analyses (Johnson Ching Hong Li and Virginia Man Chung Tze). Multilevel Modeling and Multilevel Structural Equation Modeling in Lifespan Developmental Analyses (Kimberly L. Fine and Kevin J. Grimm). Daily Diary Designs in Lifespan Developmental Psychology (Shevaun D. Neupert and Jennifer A. Bellintier). Experience Sampling in Lifespan Developmental Methodology (Michaela Riediger and Antje Rauers). Measurement Burst Designs in Lifespan Developmental Research (Gawon Cho, Giancarlo Pasquini, and Stacey B. Scott). Mixed Methods Research in Adult Development and Aging (Joseph E. Gaugler, Colleen M. Peterson, Lauren L. Mitchell, Jessica Finlay, and Eric Jutkowitz). Mixture Modeling for Lifespan Developmental Research (Alexandre J.S. Morin and David Litalien). Dyadic Designs in Lifespan Developmental Methodology (Jeremy B. Yorgason, Melanie S. Hill, and Mallory Millett). Statistical Analysis of Dyadic Data in Lifespan Developmental Research (Gizem Hülür and Elisa Weber)

Biomarkers

Biodiversity Metrics in Lifespan Developmental Methodology (Lizbeth Benson and Nilam Ram). Blood Pressure As a Biomarker in Gerontological Research (Thomas M. Hess, Erica L. O'Brien, and Claire M. Growney). Erythrocyte Sedimentation Rate as a Biomarker for Stress and Aging Research (Carolyn M. Aldwin and Ritwik Nath). Everyday Salivary Cortisol as a Biomarker Method in Lifespan Developmental Methodology (Christiane A. Hoppmann, Theresa

Pauly, Victoria I. Michalowski, and Urs M. Nater). Inflammation as a Biomarker Method in Lifespan Developmental Methodology (Stephanie J. Wilson, Alex Woody, and Janice K. Kiecolt-Glaser)

Cognitive Aging and Neuroscience

Brain Organization

Healthy and Pathological Neurocognitive Aging: Spectral and Functional Connectivity Analyses Using Magnetoencephalography (Gianluca Susi, Jaisalmer de Frutos-Lucas, Guiomar Niso, Su Miao Ye-Chen, Luis Antón Toro, Brenda Nadia Chino Vilca, and Fernando Maestù). Neurocognitive Aging and Brain Signal Complexity (Anthony Randal McIntosh). Neurocognitive Aging and Functional Connectivity Using Functional Magnetic Resonance Imaging (Hana Burianová). A Review and Reappraisal of the Default Network in Normal Aging and Dementia (Jessica R. Andrews-Hanna, Matthew D. Grilli, and Muireann Irish). Theoretical Perspectives on Age Differences in Brain Activation: HAROLD, PASA, CRUNCH-How Do They STAC Up? (Sara B. Festini, Laura Zahodne, and Patricia A. Reuter-Lorenz)

Cognition

Cognition and Mobility With Aging (Karen Z. H. Li, Halina Bruce, and Rachel Downey). Episodic Future Thinking and Cognitive Aging (Daniel L. Schacter, Alea L. Devitt, and Donna Rose Addis). Implicit Memory and Cognitive Aging (Emma V. Ward and David R. Shanks). Intraindividual Reaction Time Variability, Attention, and Age-Related Outcomes (David Bunce and Sarah Bauermeister). Language and Cognitive Aging (Lori E. James and Sara Anne Goring). Metamemory and Cognitive Aging (Christopher Hertzog and Taylor Curley). Prospective Memory and Cognitive Aging (Simon J. Haines, Jill Talley Shelton, Julie D. Henry, Gill Terrett, Thomas Vorwerk, and Peter G. Rendell). Speech Comprehension and Cognition in Adult Aging (Nicole D. Ayasse, Alexis R. Johns, and Arthur Wingfield). Temporal Dynamics of Prospective Memory (Event-Related Potentials) (Robert West). Visual Attention With Cognitive Aging (David J. Madden and Zachary A. Monge). Working Memory and Cognitive Aging (Paul Verhaeghen)

Intervention

Aging and Cognitive Skill Learning (Jack Kuhns and Dayna R. Touron). Cognitive Intervention in Older Adults With Mild Cognitive Impairment (Benjamin Boller and Sylvie Belleville). Cognitive Rehabilitation in Mild and Moderate Dementia (Aleksandra Kudlicka and Linda Clare). Memory Rehabilitation in Healthy Aging (Nicole D. Anderson)

Aging in Social-Physical-Technical-Cultural Environments

Subjective Aging

Awareness of Aging Processes (Anne Josephine Dutt, Hans-Werner Wahl, and Manfred Diehl). Critical Role of Social-Cognitive Age Representations (Alison Chasteen, Maria Iankilevitch, Jordana Schiralli, and Veronica Bergstrom). Subjective Aging and Health (Gerben J. Westerhof and Susanne Wurm). **Social Connection.** Aging Couples: Benefits and Costs of Long Intimate Relations (Victoria I. Michalowski, Denis Gerstorff, and Christiane A. Hoppmann). Parent-Child Relations and Their Importance for Older Adults (Kyungmin Kim and Yijung Kim). Social Isolation and Loneliness in Old Age (Clemens Tesch-Roemer and Oliver Huxhold). Social Participation and Volunteering in Later Life (Nancy Morrow-Howell, Yi Wang, and Takashi Amano). Social Relationships Across Adulthood and Old Age (Cornelia Wrzus and Jenny Wagner)

Physical

Life Space in Older Adults (Markus Wettstein, Hans-Werner Wahl, and Michael Schwenk). Physical Contexts and Behavioral Aging (Frank Oswald and Hans-Werner Wahl). Technology Use by Older Adults (Sara J. Czaja and Chin Chin Lee)

Macro

Aging Societies and the Ethical Challenges of Long Life (Allison R. Heid and Steven H. Zarit). Cultural Variance and Invariance of Age Differences in Social Cognition (Li Chu, Yang Fang, Vivian Hiu-Ling Tsang, and Helene H. Fung). Population Aging and Globalization: The Impact of Cultural and Social Change (Christopher Phillipson)

Clinical Geropsychology

Healthy Aging

Physical Activity and Inactivity Impacts on Cognitive and Emotional Functioning in Later Life (Patrick D. Gajewski and Michael Falkenstein). Resilience in Later Life (Nancy A. Pachana, Nicola W. Burton, Deirdre McLaughlin, and Colin A. Depp). Trajectories of Well-Being in Later Life (Nardi Steverink)

Pathology

Acquired Brain Injury (Stroke and TBI) in Later Life (Megan S. Barker, Emily C. Gibson, and Gail A. Robinson). Anxiety Disorders in Late Life (Jonathan S. Gooblar and Sherry A. Beaudreau). Autism Spectrum Disorders in Later Life (Ye In (Jane) Hwang and Julian Trollor). Comorbidities of Physical and Psychiatric Syndromes in Later Life (Lydia K. Manning, Lauren M. Bouchard, and James L. Flanagan). Dementia Syndromes in Late Life (Shellie-Anne T. Levy and Glenn E. Smith). HIV/AIDS in Later Life (Philip Sayegh, David J. Moore, and Pariya Fazeli Wheeler). Personality Disorders in Later Life (S. P. J. van Alphen and S. M. J. Heijnen-Kohl). Progressive Neurological Conditions and Their Impact on Psychological Well-Being in Later Life (Nadeeka N. Dissanayaka). Substance Use in Later Life (Stephen J. Bright). Suicide in Later Life (Kim Van Orden, Caroline Silva, and Yeates Conwell)

Assessment

Capacity Assessment Across Functional Domains in Later Life (Benjamin T. Mast and Diana DiGasbarro). Psychological Assessment of Older Persons (Jarred Gallegos, Julie Lutz, Emma Katz, and Barry Edelstein).

Therapy

Caregiving Issues for Older Adults (Andres Losada). Interpersonal Psychotherapy for Older Adults (Gregory A. Hinrichsen). Schema Therapy With Older Adults (A. C. Videler)

Care Systems

Home-Based Care and Primary Care Settings for Delivery of Geropsychology Services to Older Persons (Srijana Shrestha). International Perspectives on Residential Aged Care (Nasreen A. Sadeq and Victor Molinari)

Training

Clinical Training Concerns in Mental Health Service Provision to Older Persons (M. Lindsey Jacobs and Patricia M. Bamonti). Interprofessional Training and Practice: The Need for More Engagement, Training, and Research in Geropsychology (Nancy A. Pachana and Gwen Yeo)
