The Oxford Handbook of Cognitive Neuroscience, Two Volume Set

Oxford Library of Psychology Series

Edited by **Kevin Ochsner** and **Stephen M. Kosslyn**

2013年12月出版 全2巻/1184ページ 定価 61,380円

- ◇ Covers central aspects of the field of cognitive neuroscience, including its history and historically important foundational research areas
- ◇ A must-have resource for students and researchers interested in the current state of knowledge in cognitive neuroscience and related fields
- ◇ A rich source of authoritative information that supports reading and study in the field of cognitive neuroscience, this two-volume handbook reviews the current state-of-the-science in all major areas of the field.

符号化と意識との結びつきを探求する初めての研究書。
何が脳を脳たらしめているのか？これが本書の中心問題です。神経科学、精神医学、哲学の異なる諸分野への挑戦を試みつつ、著者は神経コードを背景とした脳の静止状態とそれが人間意識を創造する可能性について新しい追究を行っています。
神経科学、認知科学、認知心理学関係の研究者、院生レベルの学生にお薦めいたします。

Vol 2: Consciousness

2013年12月出版 560ページ ISBN 9780199826995 定価 ¥19,420

CONTENTS of Vol 1: List of Figures. Preface. Introduction to Volume I. **Part I: Coding Extrinsic Stimuli: From the Environment to the Brain.** Chapter 1: Sparse Coding and Natural Statistics. Chapter 2: Sparse Coding and Neural Inhibition. Chapter 3: Sparse Coding on a Regional Level. **Part II: Coding Intrinsic Activity: From the Brain to the Brain.** Chapter 4: Spatial Structure of Intrinsic Activity. Chapter 5: Temporal Structure of Intrinsic Activity. Chapter 6: Sparse Coding of Intrinsic Activity. **Part III: Coding Intrinsic Predictions: From the Brain to Anticipation.** Chapter 7: Predictive Coding and Difference-Based Coding. Chapter 8: Predictive Coding and Social and Vegetative Statistics. Chapter 9: Predictive Coding and the Brain's Intrinsic Activity. **Part IV: Coding Extrinsic Activity: From the Brain to the Environment.** Chapter 10: Stimulus-Stimulus Interaction and Neural Coding. Chapter 11: Rest-Stimulus Interaction and Difference-Based Coding. Chapter 12: Rest-Stimulus Interaction and GABA. Epilogue: A Quick Guide to the Brain. Appendix: Theoretical Reflections. Appendix I: Neuro-Empirical Remark: Resting State Activity versus Stimulus-Induced Activity and the Continuity Hypothesis. Appendix II: Neuro-Theoretical Remark: Localizationism versus Holism. Appendix III: Neuro-Conceptual Remark: Concept of Appendix IV: Neuro-Epistemological Remark: Brain versus Observer. References. Index.

CONTENTS of Vol 2: List of Figures. Preface. Introduction to Volume II. **Part V Spatiotemporal Continuity and Consciousness.** Chapter 13: Midline regions and 'Stream of Consciousness'. Chapter 14: Slow cortical potentials and 'width of presence'. Chapter 15: Temporal nestedness and 'duration bloc'. Chapter 16: Functional Connectivity and 'Inner space consciousness'. Chapter 17: Glutamate, GABA, and 'Inner time and space consciousness'. **Part VI Spatiotemporal Unity and Consciousness.** Chapter 18: Resting state and Pre-Phenomenal Unity. Chapter 19: Gamma and Phenomenal Unity. Chapter 20: Natural statistics and 'environment-brain unity'. Chapter 21: Unity and Subjectivity. Chapter 22: Unity and subjectivity in schizophrenia. **Part VII Spatiotemporal Organisation and Consciousness.** Chapter 23: Resting state and Self-specificity. Chapter 24: Self-Specificity and Self-perspectival organisation. Chapter 25: Resting state and pre-intentional organisation. Chapter 26: Neuro-Phenomenal Evidence - Dreams and Mind wandering. Chapter 27: Neuro-Psychiatric Evidence - Schizophrenia and Depression. **Part VIII Spatiotemporal Quality and Consciousness.** Chapter 28: Resting state and Qualia. Chapter 29: Rest-Stimulus interaction and Qualia. Chapter 30: Neuronal transfer and Qualia. Chapter 31: Affect and Qualia. Chapter 32: Body and Qualia. Epilogue: Keyholes in the brain's door to consciousness. Appendix: Related Issues. Appendix to Introduction/Appendix 1: Brain and Consciousness. Appendix to Part I/Appendix 2: Brain and Time. Appendix to Part II/Appendix 3: Brain and Unity. Appendix to Part III/Appendix 4: Brain and Self. References.

Handbook of Research Methods for Studying Daily Life. Dec 2013, 676pp., Paperback (Guilford) ISBN:9781462513055 ¥10,100

Bringing together leading authorities, this unique handbook reviews the breadth of current approaches for studying how people think, feel, and behave in everyday environments, rather than in the laboratory. The volume thoroughly describes experience sampling methods, diary methods, physiological measures, and other self-report and non-self-report tools that allow for repeated, real-time measurement in natural settings. Practical guidance is provided to help the reader design a high-quality study, select and implement appropriate methods, and analyze the resulting data using cutting-edge statistical techniques. Applications across a wide range of psychological subfields and research areas are discussed in detail. (Hardcover ISBN 9781609187477 ¥20,200 (2011))

Growth Curve Analysis and Visualization Using R.

April 2014, 200pp., Hardback (Chapman & Hall/CRC Pr.) ISBN:9781466584327 ¥12,700

Accessible to quantitative psychology researchers, this book introduces growth curve analysis (GCA) methods for applications in the behavioural sciences. It introduces the challenges involved with this type of data, discusses the basics of GCA, and explains how the methods can be used to analyse the data. The book takes a very practical approach, emphasizing visualization and keeping mathematical details to a minimum. It includes many real data examples from cognitive science and social psychology and integrates R code for the implementation of the methods.

23. Spencer, N.H.

Essentials of Multivariate Data Analysis.

Jan 2014, 168pp., Paperback (Chapman & Hall/CRC) ISBN:9781466584785 ¥8,890

This text presents an overview of multivariate data analysis suitable for quantitative researchers. Instead of providing mathematical details, it gives readers only the essential information needed to decide which method to use, how to apply it, and how to interpret the results. Each chapter explains how to perform the analysis and how to use the supporting Excel add-in to implement the analysis. A fictional data set is used throughout the book to ensure that all particular aspects of the data analyses can be readily shown.

24. Yan, Duanli et al. (eds)

Computerized Multistage Testing: Theory and Applications.

(Chapman & Hall/CRC Statistics in the Social and Behavioral Sciences) March 2014, 500pp., Hardback (Chapman & Hall/CRC) ISBN:9781466505773 ¥14,730

With contributions from top psychometricians in the field, this book covers the psychometric theory, methodologies, and applications for computerized multistage testing (MST). It discusses the history of MST, test design and implementation for various purposes, item pool development and maintenance, IRT-based and classical test theory-based methodologies for test assembly, routing and scoring, equating, and text security. The book also explores applications, their challenges, and innovative future assessments using MST.

(Paper ISBN 9781446283004 ¥8,890)

This book provides an introduction to the technology and techniques of EEG in the context of social neuroscience research that will appeal to investigators (students of researchers) wishing to broaden their research aims to include EEG, and to those already using EEG but wishing to expand their analytic repertoire.

【脳-行動関係モデルとしてのADHD】

28. Koziol, L.F. et al.

ADHD as a Model of Brain-Behavior Relationships. (SpringerBriefs in Neuroscience / The Vertically Organized Brain in Theory and Practice) Aug 2013, 103pp., Softcover (Springer) ISBN:9781461483816 ¥10,600

Focuses on heterogeneity of presentations of ADHD and inadequacy of making the diagnosis on basis of behavior rating scales. Discusses the difference between the DSM observational system and attention as a cognitive process. Explains why the DSM system generates many false negative and false positive errors among the attention disorder population.

Handbook of Executive Functioning. Aug
2013, 580pp., Hardcover (Springer)
ISBN:9781461481058 ¥52,810

The *Handbook of Executive Functioning* cuts through the confusion, analyzing both the whole and its parts in comprehensive, practical detail for scholar and clinician alike. Background chapters examine influential models of EF, tour the brain geography of the executive system, and pose salient developmental questions. A section on practical implications relates early deficits in executive functioning to ADD and other disorders in children, and considers autism and later-life dementias from an EF standpoint. Further chapters weigh the merits of widely used instruments for assessing executive functioning and review interventions for its enhancement, with special emphasis on children and adolescents.

Handbook of Child Maltreatment. (Child Maltreatment, Vol 2) Sept 2013, 573pp., Hardcover (Springer) ISBN:9789400772076 ¥52,810

This Handbook examines core questions still remaining in the field of child maltreatment. It addresses major challenges in child treatment work, starting with the question of what child abuse and neglect is exactly. It then goes on to examine why maltreatment occurs and what its consequences are. Next, it turns to prevention, treatment and intervention, as well as legal perspectives. The book studies the issue from the perspective of the broader international and cross-cultural human experience. Its aim is to review what is known, but even more importantly, to examine what remains to be known to make progress in helping abused children, their families, and their communities.

Psychology of Creativity: Advances in Theory, Research and Application. Oct 2013, 227pp., Hardcover (Nova Science) ISBN:9781628081404 ¥23,310

The aim of this book is to discuss recent developments in the field of creativity. More precisely, attention has been paid to four aspects. Firstly, the concept of creativity changes as a consequence of transformations in the social and cultural environment. Thus, the way creativity is meant needs to be always updated by referring it to new requests and goals. Secondly, new theoretical constructs are proposed or unsuspected links between creativity and other notions are explored, so as to revise the old concepts. Thirdly, new research methods and instruments are devised and investigators have new opportunities to shed light on further aspects of creativity. Finally, both researchers and professionals discover new fields where creativity can be cultivated and trained, broadening the range of possible applications.

Epistemology of Psychology: A New Paradigm – The Dialectics of Culture and Biology. 2013, 206pp., Hardcover (Nova Science) ISBN:9781624176173 ¥23,310

To understand the nature of human beings and their development means to clarify the relationship or inter-functionality between contributing factors and ingredients. The mystery of man is not revealed by studying each ingredient separately, but by focusing on the relationships between the building blocks, and how these elements are changed and become something else and typically human when combined. This book explains how higher psychological functions develop from a biological basis. It presents the cultural-historical approach separating lower and higher psychological functions, emphasising the importance of psychological tools like language for human consciousness. The book's main aim is to contribute to the discussion about psychological epistemology taking into consideration new knowledge from research in human sciences like anthropology, cultural psychology, cognitive psychology, developmental psychology, and neuroscience.

Psychology of Risk-Taking. 2013, 221pp., Hardcover (Nova Science) ISBN:9781624175077 ¥23,310

This book reviews the main contemporary dimensions in the study of the psychology of risk-taking. In an introduction, the Editor J P Assailly (IFSTTAR) proposes a synthesis

on the interactions between the psychological, biological and environmental perspectives on risk-taking, risk perception and risk acceptance. In the genesis of risky decision-making, the authors analyse the dynamic self-regulatory processes, their neuropsychological underpinnings (the dysfunctions of executive functions control and the somatic marker framework /hyperactivity of the limbic system, and hypoactivity of the prefrontal cortex). To treat the consequences of this neuropsychological vulnerability, the authors propose to adapt interventions as brief motivational interviews and contingency management.

The Psychology of Women: Diverse Perspectives from the Modern World. 2013, 205pp., Hardcover (Nova Science) ISBN:9781622578993 ¥23,310

The experience of being a woman in the modern world cannot be easily described using a series of psychological clichés and generic feminist language. This book contains contributions from scholars and clinical practitioners around the globe (USA, Canada, China, Italy, UK). Collectively, these chapters show that studying the psychology of women in the modern world mandates the appreciation of diversity. Topics include pregnancy, motherhood, lifestyle

issues, healthcare, gender role conflicts, stress management, addiction recovery, and trauma resolution. Information on causality and development of phenomena; implications for clinical care; and offering improved services for women are discussed throughout. Although primarily a psychology volume, influences from many academic disciplines, including public health, sociology, medicine, and literature are woven into the chapters, highlighting the importance of integrated approaches in conceptualising the experiences of women in the modernity.

Individual Adaptability to changes at work refers to an individual's response to new demands or ill defined problems created by uncertainty, complexity, mergers, and any rapid change in the work situation. Today, one of the key factors for individual's success is said to be adaptability. In the past two decades there has been increasing interest in the research on individual adaptability, and this is one of the first academic volumes to look at this important topic. Specific contexts that will be addressed include newcomer adaptation, team building and functioning, work-family conflict, retirement and career management. The book will provide a comprehensive and integrated analysis of the conceptual, assessment and contextual issues that will help identify the current trends and emerging themes in adaptability research.
